

K2 4.5 Update KB001390 New Features List

New Feature	Description	K2 blackpearl	K2 blackpoint	Prerequisite
K2 Designers				
Batch Action of SharePoint Workflow Integration Work Items	The ability to allow SharePoint Workflow Integration work items to be actioned without opening the worklist item in a form. It can now be actioned, for example from worklist without opening the item, batch actions from worklist, K2 Services through coding against WCF or REST, or any application that uses the Workflow.Client API to action work items.			N/A
Upload InfoPath Form Wizard	Allows an InfoPath form to be upload to a SharePoint library when used with an InfoPath Integrated process.			InfoPath 2007 or InfoPath 2010
Installation				
SharePoint 2010 Claims based Authentication (Incoming Claims only)	Support for intranet (Kerberos/NTLM) and extranet scenarios for LDAP (Forms-based) and ADFS 2.0 (Trusted Provider). Scenarios where the claim must be packaged again and sent to a different system are considered Outgoing claims support and that is not supported.			SharePoint 2010 Foundation or SharePoint Server 2010 and Windows Identity Foundation
SharePoint 2010/Office 2010 SP1 Support	Support for SharePoint 2010 SP1 and June Cumulative Update per the SharePoint team blog: http://blogs.technet.com/b/office_sustained_engineering/archive/2011/06/29/sharepoint-2010-sp1-and-the-june-cumulative-update-for-sharepoint-2010.aspx SP1 Known Issue: http://support.microsoft.com/kb/2532126 . After SharePoint Server 2010 SP1 is installed, the Workflow feature is disabled when a new site collection is created. To use the Workflow feature in a new site collection, enable it in the Site Collection Settings page.			SharePoint 2010 Foundation or SharePoint Server 2010 or Microsoft Office 2010

K2 4.5 Update KB001390 New Features List
